Quest Science Center Announces 7th Annual Tri-Valley Innovation Fair

LIVERMORE, Calif. (March 2025)—Quest Science Center is excited to announce the seventh annual Tri-Valley Innovation Fair this year will be held at the Alameda County Fairgrounds on Saturday, April 12, 2025. Admission to the Tri-Valley Innovation Fair is free to the public, takes place indoors and outside, and is open from 10AM to 5PM.

The Tri-Valley Innovation Fair is a dynamic, interactive event designed to inspire all age groups by immersing them in the wonders of science, engineering, and technology. With over 80 exhibitors and a series of engaging performances throughout the day, the Innovation Fair highlights our region's diverse achievements and offers hands-on opportunities to explore, experiment, and ask questions. This year, the Innovation Fair is introducing two exciting exhibit halls on healthcare & biotech and sustainability & planetary health.

Attendees will have the chance to meet the people who make innovation happen at a wide range of regional companies, community and educational organizations. Fully supported by volunteers, sponsors, and community organizations, the Tri-Valley Innovation Fair invites you to join its growing network of contributors. A long-time partner, the Clorox Company "believes innovation and science are key to building a future where everyone can thrive. That's why our Science Education team is proud to support the Tri-Valley Innovation Fair as both a Sponsor and Exhibitor, bringing hands-on experiences that inspire curiosity - empowering the next generation of innovators in the Tri-Valley and beyond."

Registration is now open for exhibitors, sponsors, and volunteers. For more information on how you can get involved, please visit <https://quest-science.org/innovation-fair/>.

About Quest Science Center

In 2018, a group of national lab retirees and community leaders came together to share their passion for science and technology while "paying it forward." Their goal was to establish a science center in Livermore that would serve the greater Tri-Valley and San Joaquin County areas, providing engaging, hands-on experiences for people all ages.

They envisioned a space where visitors of any age could explore the science and technology shaping our lives and surrounding regions, fostering curiosity and promoting lifelong learning. To bring this vision to life, an advisory board of dedicated volunteers and regional partners has been working collaboratively to establish the center.

During the pandemic, Quest pivoted to become a “science center without walls,” reaching over 20,000 visitors annually. As Quest continues on the path toward a permanent home, we continue to deliver dynamic, real-world learning experiences on wide-ranging topics including healthcare, water systems, computer-generated art and music, space, transportation, and advanced manufacturing. For more information on Quest, visit <https://quest-science.org/>
